

Comfort & Cooling

Moisture transfer

Ecowindry®

Ecowindry®

Recycle • Dry Function

Ecowindry® 纖維運用次微米與奈米複合礦石粉體之研磨、分散與改質技術，添加於聚酯纖維中，具有優越的吸濕快乾特性，穿著於戶外運動可平衡溫度，達到降溫、抗紫外線、吸濕排汗與舒適之效果。

Ecowindry® fibers have excellent moisture transfer and fast drying characteristics, wearing in outdoor sports can balance the temperature to achieve temperature decreased, Anti-UV, moisture transfer, and comfort effects.

快速排汗
Fast Drying

水分吸收
Moisture Absorption

抗紫外線
UV-Cut

水分在針織物上散發狀況

Speedy fresh fabric

水分於短時間內可散發於空氣中
The water will be transferred to the surface within a short time

針織物溫差比較圖

Temperature difference comparison of the fabrics

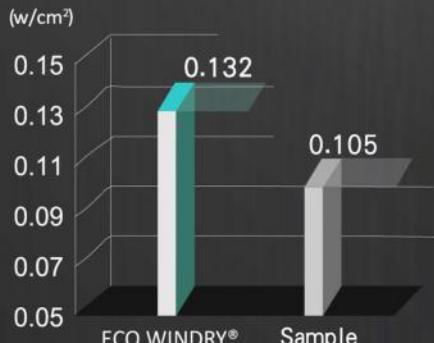

Ecowindry® 纖維有助於平衡溫度及降溫功能，有效提升穿著之舒適性

Ecowindry® fiber, its excellent moisture transfer and dry can balance the temperature, and get the result of losing temperature rapidly when wearing it

市售涼感針織物Qmax比較

Qmax comparison of cool fabrics

瞬間涼感值越高表示織物有散熱快且吸熱慢之特性

The Qmax value of Ecowindry® fabric is achieved 0.132W/cm² due to excellent thermal diffusion
